### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William Pieprz, reg. No. 33,630 on September 12, 2005.

2. The amendments to **claims 25 and 26** are attached in the current Office Action.
3. The application has been amended as follows:

***Claim 25. (currently amended)*** A capability exchanging method for controlling a transmitting Internet facsimile apparatus connected to a receiving Internet facsimile apparatus via the Internet, the transmitting Internet facsimile apparatus being a same type device as the receiving Internet facsimile apparatus, the transmitting Internet facsimile apparatus being connected with a first server apparatus via a LAN and with a second server apparatus via the Internet, at least one of the first server apparatus and the second server apparatus storing capabilities regarding facsimile data that a the receiving Internet facsimile apparatus is capable of receiving, the capability exchanging method comprising:

accessing the first server apparatus;

determining whether or not the first server stores the capabilities regarding facsimile data that the receiving Internet facsimile apparatus is capable of receiving, the capabilities including one of a resolution, a paper size, a compression format, and an

encryption format that are utilized for a facsimile communication between the transmitting Internet facsimile apparatus and the receiving Internet facsimile apparatus;

obtaining, from the second server apparatus, capabilities regarding facsimile data that the receiving Internet facsimile apparatus is capable of receiving, when the first server apparatus is determined not to store the capabilities regarding facsimile data that the receiving Internet facsimile apparatus is capable of receiving, the second server being a DNS server apparatus that stores the capabilities of the receiving Internet facsimile apparatus in association with an e-mail address of the receiving Internet facsimile apparatus;

transforming image data, based on the obtained capabilities regarding facsimile data that the receiving Internet facsimile apparatus is capable of receiving;

converting the transformed image data into data for Internet transmission;

transmitting the converted data to the receiving Internet facsimile apparatus; and

storing, in the first server apparatus, the capabilities regarding facsimile data that the receiving Internet facsimile apparatus is capable of receiving, the capabilities being obtained from the second server.

***Claim 26. (currently amended)*** A transmitting Internet facsimile apparatus connected with a receiving Internet facsimile apparatus via a server apparatus on the Internet, the transmitting Internet facsimile apparatus being a same type device as the receiving Internet facsimile apparatus, the transmitting Internet facsimile apparatus comprising:

Art Unit: 2622

a communicator configured to communicate with a first server apparatus and with a second server apparatus via the Internet;

a controller that, when the first server apparatus is determined not to store the capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, is configured to obtain, from the second server apparatus, the capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive and to store, in the first server apparatus, the obtained capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, the capabilities including one of a resolution, a paper size, a compression format, and an encryption format that are utilized for a facsimile communication between the transmitting Internet facsimile apparatus and the receiving Internet facsimile apparatus, the second server being a DNS server apparatus that stores the capabilities of the receiving Internet facsimile apparatus in association with an e-mail address of the receiving Internet facsimile apparatus,

the controller being further configured to transform image data, based on the obtained capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, to convert the transformed image data into data for Internet transmission, and to transmit the converted data to the receiving Internet facsimile apparatus.

***Allowable Subject Matter***

4. **Claims 13, 14, 16-19, 21 and 24-26** are allowed. These claims will be renumbered as 1-10.

5. The following is an examiner's statement of reasons for allowance:

The instant application recites a transmitting Internet facsimile apparatus connected with a receiving Internet facsimile apparatus via a server apparatus on the Internet, the transmitting Internet facsimile apparatus being a same type device as the receiving internet facsimile apparatus, the transmitting Internet facsimile apparatus comprising:

a communicator configured to communicate with a first server apparatus and with a second server apparatus via the Internet; and

a controller configured to access the first server apparatus to obtain capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, the capabilities including one of a resolution, a paper size, a compression format, and an encryption format that are utilized for a facsimile communication between the transmitting Internet facsimile apparatus and the receiving Internet facsimile apparatus, the controller being further configured, when the first server apparatus is determined not to store the capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, *to obtain, from the second server apparatus, the capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, to transform image data, based on the obtained capabilities regarding facsimile data that the receiving Internet facsimile apparatus can receive, to convert the transformed image*

Art Unit: 2622

*data into data for internet transmission, and to transmit the converted data to the receiving Internet facsimile apparatus, the second server apparatus being a DNS server apparatus that stores the capabilities of the receiving Internet facsimile apparatus in association with an e-mail address of the receiving Internet facsimile apparatus.*

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
